

CHILLFI

Tester QA Checklist

Screen-by-screen, feature-by-feature sign-off — Mobile App, Website & Admin Panel

How to use this checklist

1. Open every screen listed. Use the exact steps in “What to check” as a minimum — go further if you notice anything else that looks or feels wrong.
2. Mark Result: Pass, Fail, or N/A (could not be reached / not applicable to this build).
3. If you mark Fail, set a Severity and write what went wrong in Notes — be specific: what you tapped, what you expected, what actually happened, and on which device / OS.
4. Take a screenshot for anything you mark Fail and name it so it can be matched back to the row number in this PDF (e.g. “#36 - wrong total shown.png”).
5. This PDF is fillable — open it in Adobe Acrobat Reader or a PDF app that supports form filling (typing directly into a phone or web browser’s built-in PDF viewer may not save your answers — use a dedicated PDF reader/editor app).
6. Fill in your name, device and date on the last page and return the completed PDF.

Severity guide

Critical	Blocks the core flow, loses/corrupts data, charges the wrong amount, or is a safety/privacy issue.
High	A real feature is broken or shows wrong information, but there is a workaround.
Medium	Annoying or confusing, but does not block completing the task.
Low	Cosmetic: spacing, wording, alignment, minor visual issues.

Module summary

Auth & Onboarding (Mobile App): 12 · Home & Discovery (Mobile App): 12 · Product (Mobile App): 6 · Cart & Checkout (Mobile App): 11
Orders (Mobile App): 4 · Profile (Mobile App): 9 · Notifications (Mobile App): 2 · Extra States (Mobile App): 3 · Website — Storefront: 17
Admin Panel — Auth & Dashboard: 2 · Admin — Catalog: 6 · Admin — Orders & Users: 5 · Admin — Moderation & Support: 3 · Admin —
Total: 96 screens across 14 sections.

Tester name

Device / OS

Date started

App build / version

Platform tested (iOS / Android / Web)

Auth & Onboarding (Mobile App)					
#	Screen	What to check	Result	Severity	Notes / bugs found
1	Splash Screen splash	App opens directly to the ChillFi splash with no blank white screen, then moves to Onboarding/Welcome within a few seconds. (On iOS specifically, a missing/misconfigured Firebase config can leave the whole app permanently blank -- confirm this never happens.)	◦ Pass ◦ Fail ◦ N/A	-	
2	Onboarding Screen 1 onboarding-1	"Experience Premium Shopping" slide renders correctly, Skip is visible top-right, swipe or Next advances to slide 2.	◦ Pass ◦ Fail ◦ N/A	-	
3	Onboarding Screen 2 onboarding-2	"Everything You Need, All in One Place" slide renders correctly, dot indicator shows position 2 of 3.	◦ Pass ◦ Fail ◦ N/A	-	
4	Onboarding Screen 3 onboarding-3	"Track Your Orders, Stay Updated" slide renders correctly, button changes to "Get Started" on the last slide.	◦ Pass ◦ Fail ◦ N/A	-	
5	Welcome Screen welcome	Get Started / Login-Signup / Continue as Guest all present and tappable. Onboarding must not reappear on a later app launch (first-launch-only).	◦ Pass ◦ Fail ◦ N/A	-	
6	Login Screen login	Mobile number field accepts digits only, capped at 10; +91 code fixed. Send OTP, Forgot Password, and Sign Up links all work. The "English" language selector is currently decorative only -- confirm it does not appear to silently fail when tapped (app is English-only by design).	◦ Pass ◦ Fail ◦ N/A	-	
7	OTP Verification Screen otp-verification	6-digit OTP input, resend timer counts down correctly, wrong OTP shows a clear error, correct OTP logs in and lands on Home.	◦ Pass ◦ Fail ◦ N/A	-	
8	Signup Screen signup	Name / phone / OTP fields required; signing up with an already-registered phone number shows "already registered" rather than creating a duplicate account.	◦ Pass ◦ Fail ◦ N/A	-	
9	Forgot Password Screen forgot-password	Entering a registered phone sends an OTP; an unregistered phone shows "No account found" rather than silently proceeding.	◦ Pass ◦ Fail ◦ N/A	-	
10	Reset Password Screen reset-password	New password + confirm fields; mismatch and under-length passwords are rejected with a clear message before submit.	◦ Pass ◦ Fail ◦ N/A	-	
11	Location Permission Screen location-permission	Clearly explains why location is requested. Denying permission must not crash the app or block browsing/search.	◦ Pass ◦ Fail ◦ N/A	-	
12	Notification Permission Screen notification-permission	Clearly explains why push notifications are requested. Denying must not block using the rest of the app.	◦ Pass ◦ Fail ◦ N/A	-	

Home & Discovery (Mobile App)					
#	Screen	What to check	Result	Severity	Notes / bugs found
13	Home Dashboard home-dashboard	Banner carousel, quick-action icons, categories, flash-deals countdown, and the rewards/offer cards all load with real data. A long banner title (e.g. "Monsoon Sale -- Up to 70% Off") must display in full, never hidden behind the product image.	☐ Pass ☐ Fail ☐ N/A	-	
14	Search Screen search	Typing shows live product suggestions; recent searches and trending searches lists both populate and are tappable.	☐ Pass ☐ Fail ☐ N/A	-	
15	Voice Search Screen voice-search	Tapping the mic opens voice input and a spoken phrase correctly becomes the search query. Requires a real device -- simulator/emulator microphones are unreliable.	☐ Pass ☐ Fail ☐ N/A	-	
16	Categories Screen categories	Grid of top-level categories with icons; tapping opens the correct Sub Categories or Product Listing.	☐ Pass ☐ Fail ☐ N/A	-	
17	Sub Categories Screen sub-categories	Shows the real subcategories for the parent category actually selected, not a fixed/hardcoded list.	☐ Pass ☐ Fail ☐ N/A	-	
18	Brand Listing Screen brand-listing	All active brands shown with logo and live product count; tapping a brand correctly filters Product Listing.	☐ Pass ☐ Fail ☐ N/A	-	
19	Flash Deals Screen flash-deals	Countdown timer is live and accurate; discounted prices match what's shown on Product Details for the same item.	☐ Pass ☐ Fail ☐ N/A	-	
20	Trending Products Screen trending-products	Products shown reflect the backend's actual trending/rating data, not a fixed static list -- confirm it changes as ratings/sales change.	☐ Pass ☐ Fail ☐ N/A	-	
21	Offer Products Screen offer-products	Only products with a genuinely active offer/coupon appear; expired offers should not still be listed here.	☐ Pass ☐ Fail ☐ N/A	-	
22	New Arrivals Screen new-arrivals	Sorted newest-first; adding a new product in Admin should make it appear here.	☐ Pass ☐ Fail ☐ N/A	-	
23	Recently Viewed Screen recently-viewed	Reflects only products this specific account actually opened, most-recent-first; correct empty state before any product has been viewed.	☐ Pass ☐ Fail ☐ N/A	-	
24	Recommended Products Screen recommended-products	Works for guests (generic recommendations) and for logged-in users (personalized from recently-viewed categories) -- guests must not be blocked from this section.	☐ Pass ☐ Fail ☐ N/A	-	

Product (Mobile App)

#	Screen	What to check	Result	Severity	Notes / bugs found
25	Product Listing Screen product-listing	Category/brand/price filters and price/rating/newest sort all actually narrow and reorder results; filters can be cleared back to the full list.	☐ Pass ☐ Fail ☐ N/A	-	
26	Product Details Screen product-details	Price, discount %, rating, and stock count are correct. The "You may also like" section shows properly comma-formatted prices (e.g. ■24,999), never a raw decimal like ■24999.00, and text never overflows behind images.	☐ Pass ☐ Fail ☐ N/A	-	
27	Product Image Gallery product-gallery	Swipe between images and pinch-to-zoom both work; every image actually loads (no broken-image icons).	☐ Pass ☐ Fail ☐ N/A	-	
28	Similar Products Section similar-products	Related products come from the same category and correctly exclude the product you're currently viewing.	☐ Pass ☐ Fail ☐ N/A	-	
29	Product Reviews Screen product-reviews	Review list and star-rating breakdown are accurate. Submitting a second review for the same product updates your existing review rather than creating a duplicate.	☐ Pass ☐ Fail ☐ N/A	-	
30	Write / Edit Review write-review	Star rating is required before submit is enabled; title/body fields validate; submitted review appears in the list immediately.	☐ Pass ☐ Fail ☐ N/A	-	

Cart & Checkout (Mobile App)

#	Screen	What to check	Result	Severity	Notes / bugs found
31	Cart Screen cart	Quantity +/- updates subtotal, tax, and delivery fee correctly and immediately. An EMPTY cart must show ■0 total -- never a phantom delivery charge.	☐ Pass ☐ Fail ☐ N/A	-	
32	Empty Cart Screen empty-cart	Friendly empty state with a "Shop Now" call-to-action; layout does not break with 0 items.	☐ Pass ☐ Fail ☐ N/A	-	
33	Add Address Screen add-address	All required fields enforced, pincode format validated, and the new address appears in the address list immediately after saving.	☐ Pass ☐ Fail ☐ N/A	-	
34	Delivery Address Screen delivery-address	Selecting a different saved address updates the delivery fee correctly if pincode-based shipping rules apply.	☐ Pass ☐ Fail ☐ N/A	-	
35	Apply Coupon Screen apply-coupon	A valid coupon reduces the total by the correct amount; an invalid/expired code shows a clear error; minimum-order-value coupons are rejected below that threshold.	☐ Pass ☐ Fail ☐ N/A	-	
36	Checkout Screen checkout	CRITICAL SCREEN. The order summary total (subtotal + GST + delivery – discount) shown here must exactly equal what you're actually charged after placing the order. The "Place Order" button must stay disabled/loading until this total has fully loaded -- never let it be tapped while the price is still calculating.	☐ Pass ☐ Fail ☐ N/A	-	

#	Screen	What to check	Result	Severity	Notes / bugs found
37	Payment Method Screen payment-method	COD and online payment (PhonePe) are both selectable; choosing one does not silently clear or reset other checkout fields.	☐ Pass ☐ Fail ☐ N/A	-	
38	COD Confirmation Screen cod-confirmation	Clear, explicit confirmation step before a Cash-on-Delivery order is placed.	☐ Pass ☐ Fail ☐ N/A	-	
39	PhonePe / Razorpay Payment Screen online-payment	In production this must go to the real payment gateway. In dev/test mode a mock/auto-success page is acceptable but must clearly be labelled as a test/dev flow, never presented as a real payment.	☐ Pass ☐ Fail ☐ N/A	-	
40	Order Success Screen order-success	Shows the correct Order ID and a "Total Paid" that matches exactly what was confirmed at checkout -- no discrepancy between the two screens.	☐ Pass ☐ Fail ☐ N/A	-	
41	Order Failed Screen order-failed	Clear, honest reason for the failure; a retry does not create a duplicate order.	☐ Pass ☐ Fail ☐ N/A	-	

Orders (Mobile App)

#	Screen	What to check	Result	Severity	Notes / bugs found
42	My Orders Screen my-orders	All of this account's orders listed with correct status tabs (All / Processing / Shipped / Delivered / Cancelled). A signed-OUT guest must not see the exact same "No orders yet" as a real zero-orders account with no indication they need to log in.	☐ Pass ☐ Fail ☐ N/A	-	
43	Order Details Screen order-details	Shows the full item list, address, payment method and status timeline for the SPECIFIC order opened -- never another order's data.	☐ Pass ☐ Fail ☐ N/A	-	
44	Cancel Order Screen cancel-order	A cancellation reason is required, a confirmation step is shown, and the order's status updates immediately after cancelling.	☐ Pass ☐ Fail ☐ N/A	-	
45	Delhivery / Shiprocket Tracking Timeline tracking-timeline	Shows real courier tracking events once a courier is actually assigned. An order with no tracking ID yet must say so honestly ("Tracking ID not assigned yet") rather than showing fake progress steps.	☐ Pass ☐ Fail ☐ N/A	-	

Profile (Mobile App)

#	Screen	What to check	Result	Severity	Notes / bugs found
46	My Profile Screen my-profile	Shows the real logged-in user's name/phone/email -- never a generic placeholder like "ChillFi User" once actually authenticated.	☐ Pass ☐ Fail ☐ N/A	-	
47	Edit Profile Screen edit-profile	Editing name/email actually saves to the backend and the change is reflected the next time this screen (or Account) is opened.	☐ Pass ☐ Fail ☐ N/A	-	
48	Saved Addresses Screen saved-addresses	Add / edit / delete address all work; only one address can be the default at a time.	☐ Pass ☐ Fail ☐ N/A	-	

#	Screen	What to check	Result	Severity	Notes / bugs found
49	Notification Settings Screen notification-settings	Order-update / offer / push toggles actually persist after leaving and returning to the screen (not silently reset).	☐ Pass ☐ Fail ☐ N/A	-	
50	Help & Support Screen help-support	Every contact option actually opens the right app (WhatsApp / phone dialer / email) with correct pre-filled details, rather than doing nothing.	☐ Pass ☐ Fail ☐ N/A	-	
51	About Us Screen about-us	Content shown matches what's currently configured in Admin → Content (About page).	☐ Pass ☐ Fail ☐ N/A	-	
52	Privacy Policy Screen privacy-policy	Real policy content loads, not placeholder/lorem-ipsum text.	☐ Pass ☐ Fail ☐ N/A	-	
53	Terms & Conditions Screen terms-conditions	Same check as Privacy Policy -- real, current content.	☐ Pass ☐ Fail ☐ N/A	-	
54	Logout Screen logout	A confirmation dialog appears before logging out. After confirming, previously-accessible screens (My Orders, Wishlist) must require logging in again -- the old session must not still work.	☐ Pass ☐ Fail ☐ N/A	-	

Notifications (Mobile App)

#	Screen	What to check	Result	Severity	Notes / bugs found
55	Push Notifications Screen push-notifications	Requires a real device with Firebase properly configured. Tapping a notification opens the specific relevant screen (e.g. an order update opens that exact order).	☐ Pass ☐ Fail ☐ N/A	-	
56	Offer Notifications Screen offer-notifications	Promotional notification list; tapping one opens the relevant offer or product, not just the Home screen.	☐ Pass ☐ Fail ☐ N/A	-	

Extra States (Mobile App)

#	Screen	What to check	Result	Severity	Notes / bugs found
57	No Internet Screen no-internet	Appears reliably when connectivity actually drops mid-session (not only on cold launch); the Retry button genuinely re-checks connectivity rather than just dismissing the screen.	☐ Pass ☐ Fail ☐ N/A	-	
58	Maintenance Screen maintenance	Shown to all users the moment Admin → App Config enables maintenance mode; the message matches what's configured there, and the rest of the app must not remain usable underneath.	☐ Pass ☐ Fail ☐ N/A	-	
59	Wishlist Screen wishlist	Add/remove instantly updates the heart icon everywhere the product appears (Listing, Details, Search); wishlist persists across app restarts for logged-in users.	☐ Pass ☐ Fail ☐ N/A	-	

Website — Storefront					
#	Screen	What to check	Result	Severity	Notes / bugs found
60	Homepage web-home	Banners, categories, flash deals, trending and offer sections all load with the same live backend data as the mobile app.	☐ Pass ☐ Fail ☐ N/A	-	
61	Product Listing Page web-plp	Filters and sort behave identically to the mobile app; pagination/infinite-scroll works correctly to the end of the catalog.	☐ Pass ☐ Fail ☐ N/A	-	
62	Product Detail Page web-pdp	"You may also like" prices are comma-formatted correctly (e.g. \$24,999) -- this section has a known history of showing raw unformatted decimals, confirm it's still fixed.	☐ Pass ☐ Fail ☐ N/A	-	
63	Cart Page web-cart	Quantity changes update totals live; "You may also like" only suggests in-stock, relevant products.	☐ Pass ☐ Fail ☐ N/A	-	
64	Checkout Page web-checkout	CRITICAL SCREEN, same rule as the mobile app: the GST/delivery total shown must exactly equal what's actually charged, and "Place Order" must stay disabled while the price summary is still loading -- do not allow submitting against a stale or incomplete cart total.	☐ Pass ☐ Fail ☐ N/A	-	
65	Login / Register Page web-login	Phone/OTP login uses a real Firebase reCAPTCHA challenge -- confirm it actually appears and can be completed by a human, and does not hang indefinitely.	☐ Pass ☐ Fail ☐ N/A	-	
66	My Account Page web-account	Dashboard tiles (orders, wishlist, coupons, etc.) show real, current counts for the logged-in account.	☐ Pass ☐ Fail ☐ N/A	-	
67	Orders Page web-orders	Same checks as the mobile My Orders screen.	☐ Pass ☐ Fail ☐ N/A	-	
68	Tracking Page web-tracking	Same checks as the mobile Tracking Timeline screen.	☐ Pass ☐ Fail ☐ N/A	-	
69	Wishlist Page web-wishlist	Add/remove syncs through the shared backend -- an item wishlisted on mobile appears here too for the same account, and vice versa.	☐ Pass ☐ Fail ☐ N/A	-	
70	Contact Us Page web-contact	Submitting the form actually reaches the backend and appears in Admin → Messages with the correct name/email/subject/message.	☐ Pass ☐ Fail ☐ N/A	-	
71	About Us Page web-about	Content matches what's configured in Admin → Content.	☐ Pass ☐ Fail ☐ N/A	-	
72	Privacy Policy Page web-privacy	Real, current content loads correctly.	☐ Pass ☐ Fail ☐ N/A	-	

#	Screen	What to check	Result	Severity	Notes / bugs found
73	Terms & Conditions Page web-terms	Real, current content loads correctly.	☐ Pass ☐ Fail ☐ N/A	-	
74	Support / FAQ Page web-support	FAQ content matches Admin → Content; support contact options actually work.	☐ Pass ☐ Fail ☐ N/A	-	
75	Offers Page web-offers	Only currently-active offers/coupons are listed; expired ones must not still appear.	☐ Pass ☐ Fail ☐ N/A	-	
76	Categories Page web-categories	Full category tree loads; selecting a category correctly filters the Product Listing Page.	☐ Pass ☐ Fail ☐ N/A	-	

Admin Panel — Auth & Dashboard

#	Screen	What to check	Result	Severity	Notes / bugs found
77	Admin Login admin-login	Only admin / support_staff accounts can sign in. A customer account attempting to reach any admin route must be blocked with a clear 403, never silently granted access.	☐ Pass ☐ Fail ☐ N/A	-	
78	Admin Dashboard admin-dashboard	Revenue, order counts and the recent-orders list reflect real, current data for the selected period -- never a fixed demo number that doesn't change.	☐ Pass ☐ Fail ☐ N/A	-	

Admin — Catalog

#	Screen	What to check	Result	Severity	Notes / bugs found
79	Admin Products admin-products	Create / edit / delete all work. Uploading a product image must reject anything that isn't a valid URL/file -- a malformed entry must never silently corrupt that product's image everywhere it's shown (search, listing, home, PDP).	☐ Pass ☐ Fail ☐ N/A	-	
80	Admin Categories admin-categories	Create / edit / delete; removing a category that still has products must not orphan those products or break the storefront listing for them.	☐ Pass ☐ Fail ☐ N/A	-	
81	Admin Brands admin-brands	Create / edit / delete; the brand name/logo shown on Product Listing and Details always matches what's set here.	☐ Pass ☐ Fail ☐ N/A	-	
82	Admin Banners admin-banners	Create / edit / delete home banners; a change here appears on the mobile Home Dashboard and website Homepage without requiring a full app reinstall.	☐ Pass ☐ Fail ☐ N/A	-	
83	Admin Promo Banners admin-promo-banners	Same checks as Admin Banners.	☐ Pass ☐ Fail ☐ N/A	-	
84	Admin Coupons admin-coupons	Create / edit / delete; usage limits and expiry dates set here are actually ENFORCED at checkout on both mobile and web, not just displayed in this list.	☐ Pass ☐ Fail ☐ N/A	-	

Admin — Orders & Users

#	Screen	What to check	Result	Severity	Notes / bugs found
85	Admin Orders admin-orders	All orders listed and searchable beyond the first page; updating an order's status here is reflected for the customer on mobile/web immediately.	☐ Pass ☐ Fail ☐ N/A	-	
86	Admin Ship Order admin-ship-order	Assigning a courier/tracking ID here correctly updates the customer's Tracking Timeline. If the courier integration (Shiprocket/Delhivery) isn't configured, this must show a clear configuration error -- never fail silently or pretend a shipment was created.	☐ Pass ☐ Fail ☐ N/A	-	
87	Admin Refund Requests admin-refunds	List of refund requests; approving/rejecting updates the order's status and (if applicable) notifies the customer.	☐ Pass ☐ Fail ☐ N/A	-	
88	Admin Users admin-users	List of registered customers; suspending/deactivating a user must immediately block ALL their login methods -- including OTP login, not only password login.	☐ Pass ☐ Fail ☐ N/A	-	
89	Admin Shipping Rules admin-shipping-rules	Pincode-based delivery fee rules save correctly and are genuinely applied in the storefront's delivery-fee calculation at checkout.	☐ Pass ☐ Fail ☐ N/A	-	

Admin — Moderation & Support

#	Screen	What to check	Result	Severity	Notes / bugs found
90	Admin Reviews admin-reviews	Moderate/delete reviews; a deleted review disappears from Product Details immediately, and the product's average rating recalculates.	☐ Pass ☐ Fail ☐ N/A	-	
91	Admin Messages admin-messages	Contact-form submissions are listed here; marking as read and replying both work, and a reply is actually deliverable to the sender.	☐ Pass ☐ Fail ☐ N/A	-	
92	Admin Testimonials admin-testimonials	Create / edit / delete; changes are reflected correctly on the storefront homepage testimonials section.	☐ Pass ☐ Fail ☐ N/A	-	

Admin — Settings & Config

#	Screen	What to check	Result	Severity	Notes / bugs found
93	Admin Settings admin-settings	Store name/email/GST number/tax rate/free-shipping threshold save correctly AND actually take effect on the live storefront calculations -- not just stored and ignored.	☐ Pass ☐ Fail ☐ N/A	-	
94	Admin Credentials admin-credentials	Third-party API keys (Cloudinary, PhonePe, MSG91/2Factor, Firebase) can be updated here; a saved key must never be redisplayed in plain text afterward.	☐ Pass ☐ Fail ☐ N/A	-	
95	Admin App Config admin-app-config	Toggling maintenance mode here actually puts the live app into maintenance for all users; the force-update flag actually blocks/prompts below the configured minimum app version.	☐ Pass ☐ Fail ☐ N/A	-	

#	Screen	What to check	Result	Severity	Notes / bugs found
96	Admin Notifications admin-notifications	Sending a push broadcast must only be recorded as "sent" if Firebase is actually configured and the send genuinely succeeded -- never claim a delivery that didn't happen.	◦ Pass ◦ Fail ◦ N/A	-
